Specific Learning Outcome:

Students understand the principles of life cycle thinking and circular economy and can evaluate the importance as well as give alternative suggestions for development

Sustainability-driven Entrepreneurship-project Assignment

This is a follow-up task to the task for the specific learning outcome: Students understand the primary principles of sustainable development and environmental system management.

The task is to suggest actions which could help the company being interviewed to develop its operation according to sustainable development.

Instructions for the implementation of the task:

- Make suggestions for the company based on the interview and your findings: how they could develop their operation according to sustainable development. Bring up your findings and justify your proposal.
- Make a presentation and present it to the class or make a video and share it with the teacher and other classmates.

The task can also be done in pairs.

- Through responsible operations, Atria aim to ensure favourable conditions for our current and future operations. In accordance with the principles of sustainable development, we consider the economic, social and environmental aspects of our operations in all of our business areas. We also require our business partners to comply with similar principles in their operations.
